

## **Banks Elementary School**

Baton Rouge, LA

### **Summary Scope of Work:**

Jones Payne served as Project Architect for the window replacement program at the Banks Elementary School in Baton Rouge, Louisiana. The project scope included extensive improvements to the building's envelope, replacement of window systems with acoustically rated units, upgrades to existing ceiling assemblies, replacement of all exterior doors leading directly into classrooms, extensive ADA improvements in the classroom wings, and provisions for new HVAC systems within the educational spaces not centrally air-conditioned. The complex consisted of 23 classrooms located in four wings, with administrative offices, a multi-purpose facility, and a library.

Construction Cost: \$1,004,000

Construction Completion: 1995
