

## **Brownsfield Elementary School**

Baton Rouge, LA

### **Summary Scope of Work:**

Jones Payne provided window design and architectural services for the Brownsfield Elementary School.

Jones Payne served as the Project Architect for Brownsfield Elementary School in Baton Rouge, Louisiana. The main building, containing administrative offices, computer labs, a cafeteria and two classrooms, received acoustical window and doors, along with air conditioning upgrades for the spaces not served by the central chiller system. Three additional classroom wings totaling 18 classrooms, a three-classroom kindergarten wing, and the library building were also treated, and received upgrades to roof / ceiling assemblies. Three existing and three new, portable classrooms were relocated to form an additional classroom "wing." Selected ADA improvements, including handicapped ramps and railings were installed in the kindergarten wing.

Construction Cost: \$725,600  
Construction Completion: 1993
