Logan International Airport Logan North Service Area Environmental Impact Report (E.I.R.)

Boston, MA

Summary of scope of work:

Jones Payne led a multi-disciplinary consultant team of planners, traffic consultants, environmental consultants, air quality / noise experts in the development of an Environmental Impact Report for the North Service Area, a 43 acre site designated by Massport for consolidation of airport support functions. Per Massachusetts Environmental Protection Agency (MEPA) requirements, “no-build” and various build out scenarios were developed for the North Service Area and fully evaluated for their probable environmental effects. Existing and Proposed Land Uses included an FBO, USAir Hangar, Massport Maintenance Facility, Freight Forwarders, 2 Marriott Flight Kitchens, and Employee Parking. The E.I.R. evaluated both near term and long range development options in support of Logan Airport’s overall modernization efforts.
