Medford Square Improvements

Medford, MA

Principals of The Jones Payne Group conducted environmental assessments, design concept and construction of the pedestrian transit mall on Riverside Drive in Medford's primary commercial business district. The project also included the development of a ring road for enhanced vehicular access to the square; a parking plan, including joint development parking garage; a facade and signing study; and design construction documentation and supervision of the pedestrian mall. The plan developed a financing package using a combination of Urban Systems and Block Grant monies, which won the approval of city and state officials. Construction costs were approximately \$7 million.
